

INNOVATIVE PROCESS APPLICATIONS

IPA's Story.

Established in 2016, IPA began as a company to pick up where others left off. Our expert senior staff has over 65 years combined experience with our products as Senior Designer, Project/Applications Manager, and Operations Manager. IPA specializes in product engineering, equipment refurbishing, contract manufacturing, and aftermarket support. Our team has designed, manufactured, and commissioned roll compaction systems around the world, including Asia, Europe, and the United States to date.

IPA makes it a priority for customers to work directly with our engineers, guiding you to efficient problem solving and project design. We look forward to sharing our experiences and learning from yours.

Founders.

Jerry Cain: President; 27 years experience with material processing.

John Stoch: General Manager; 25 years experience in equipment manufacturing, assembly & procurement.

Mike Stachowicz: Chief Engineer; 23 years experience in roll compactor system design.

Capabilities.

Products & Services

- Turnkey Roll Compaction Systems - complete with recycle and PLC controls
- Size Reduction Equipment - new, improved equivalents available
 - Non-dairy and USDA Dairy construction
- Contract Manufacturing
- Lab Testing - two complete roll compaction systems
- Electrical Engineering for PLC upgrades/re-conditioning
- On-site Trouble Shooting
- Machining and fabrication expertise
- *Recondition compactors & mills
- *Spare parts

* Specializing in Fitzpatrick *Chilsonators™* & *Fitzmills™*

Customer Service.

Customer Support is one of IPA's highest priorities, understanding many companies operate 24/7 and require timely, professional, and reliable assistance. IPA offers a spare parts contract, expedited delivery, and on-site trouble shooting in order to minimize loss in production.

INNOVATIVE PROCESS APPLICATIONS

Picking up where others left off with a combined team experience of 125 years.

IPA Roll Compactor

- Turnkey roll compaction systems
- Fully automated PLC controls for optimum performance
- Twin screw design - ideal for processing fine powders
- Full in-line sampling
- 6 machine sizes available

IPA Mills

- Stainless steel, robust, rugged design for harsh environments
- Manufactured for specific application requirements
- Dairy: designed based on USDA Dairy guidelines
- 5 machine sizes available

Equipment & Controls Refurbishing

Before

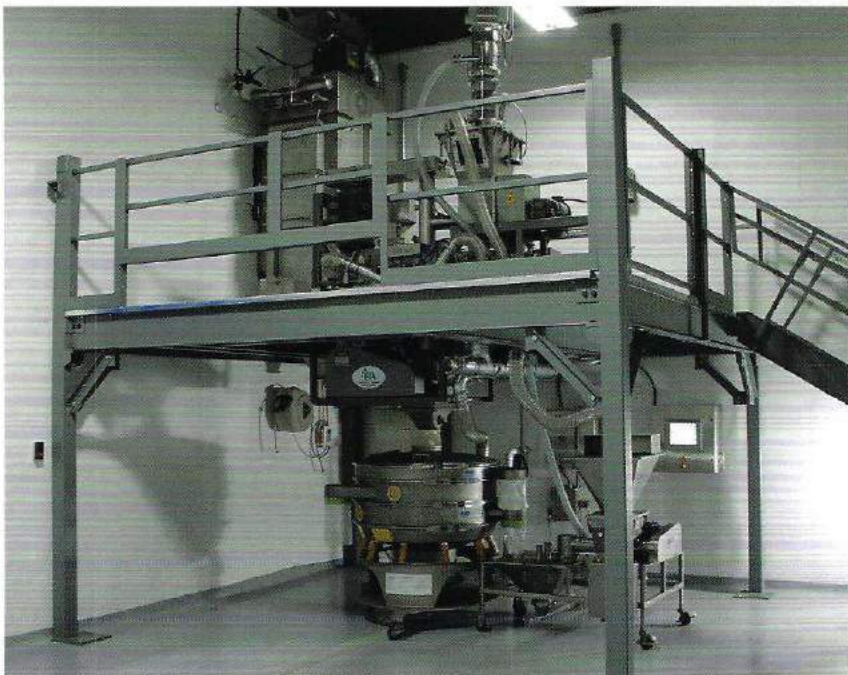

After

- Update PLC controls to latest technology
- Inspect & rebuild existing compactors & mills
- Restore second hand equipment

Contract Manufacturing

IPA houses quality equipment to improve the flowability and density of your product. We can accommodate for initial market studies, and as your production needs increase, scale the process to our larger production systems. Two full systems available for testing.
